Just wanted to say how much my son enjoyed the class! As the parent of a new young driver I am grateful such a course is available to provide additional skills to help keep him as safe as possible and become a better driver. He learned important things in the class that he never would have known about since the skills were not taught in his drivers' education class. Also have to mention the tremendous informational value received far outweighs the so very reasonable cost to take the course. I wish other teens could know about the class and be able to receive its benefits! Thanks so much from a grateful (and slightly less nervous) parent of a teen driver.
