

Welcome to Eagle Elementary School!

Welcome to Eagle Elementary School!

My name is Matt Stich and I am the principal of Eagle Elementary School. I am incredibly fortunate to be a part of a school with such rich history and traditions. I could not ask for a better group of students, staff members, parents, and community members to work with. At Eagle Elementary School, our mission is "To ensure that students excel with intellect and virtue, inspired by innovative educators who engage and challenge each individual." To accomplish our mission, we make decisions based on what is truly best for kids. This child centered approach leads to a positive school experience for all students that walk through our doors. We invite you to visit our school so that you can experience for yourself the Eagle Way! - Matt Stich, Principal

Eagle PTO

Eagle Elementary benefits from having an amazing Parent Teacher Organization. The PTO sponsors and organizes many fun and successful events including the annual Ice Cream Social, Movie Nights, Monster Mash, Bake Sales, Parent Night Out, Walk-A-Thon, and Color Runs. The profits from these events benefits the school. With the PTO's recent generous donations Eagle Elementary has been provided with funding for field trips, increased technology including Chromebooks and SMART Boards, and a regraded kickball diamond, and increased teacher budgets.

Guild Gatherings

Eagle Elementary utilizes PBIS, which is a research based, school-wide systems approach to improving school climate and creating a safer school. As a school community we meet monthly for a "Guild Gathering." At these gatherings we recognize positive behaviors that are displayed throughout the month in all classrooms and set behavioral goals for the following month. Students really enjoy the opportunity to cheer each other on.

STEAM Education

Educators at Eagle Elementary believe in the importance of preparing students for the demands of 21st century careers. STEAM is an educational approach to learning that utilizes Science, Technology, Engineering, and Arts and Mathematics as a way to guide students towards learning in a hands on way. As a result, students are more likely to experiment, develop problem solving skills, and collaborate with each other in creative ways. We are fortunate to have state of the art Makerspace, which includes Lego Robotics, a Lego Wall, a 3D Printer and a variety of technological devices, as well as space for children to be creators.

- Spelling Bee
- STARS (Students Together Achieving Real Stuff)

About Eagle Elementary School, continued

Academics

At Eagle Elementary, we take a “Student Centered” approach to learning, which provides students with voice and choice in their education. Instructionally we offer a rigorous school curriculum that is taught by dedicated educators who have received recent and ongoing professional development. This includes the following curricular programs and practices:

Literacy-

For literacy instruction a Balanced Literacy program is utilized, with focused reading and writing lessons from Units of Study developed by Lucy Calkins and The Teachers College. This includes explicit instruction in spelling, grammar, handwriting, and key-boarding.

Math-

We have recently adopted the new edition of Math Expressions in order to meet current State Standards. Students are provided with a variety of instructional methods and are actively engaged in the learning process.

Science-

Eagle Elementary is in its first year of implementing Discover Education for science instruction. This program provides a comprehensive standards-based content, professional development, Digital Science Techbooks, and streaming video content which allows students to utilize PEASD technology in the learning process.

Social Studies-

Social Studies instruction is currently focused upon the Wisconsin Model Academic Standards. Students learn about content that is centered around the five strands of social studies: behavioral science, economics, geography, history, and political science.

Education Enrichment

Instructional opportunities are differentiated, so that educators can effectively plan for student differences. In a differentiated classroom, teachers divide their time, resources, and efforts to effectively teach students who have various backgrounds, skill levels, and interests. Advanced learners are able to receive personalized learning opportunities that match their skill levels and passions.

Technology

Eagle Elementary students have access to:

- SMART Boards in every classroom
- ChromeBooks or iPads in all classrooms (Each classroom has a 1:2 ratio (meaning one device per two students). There are Chromebooks in the library for checkout to classrooms that want to have a 1:1 ratio.
- A state of the art Makerspace with: a 3D Printer, Lego Robotics, Osmo, and more.
- Document Cameras in all classrooms.
